Coats® Aquamelt™

Smarter temporary stitching for cleaner, faster production

Coats Aquamelt is engineered to perform when you need it—and disappear when you don't. This innovative water-soluble thread provides the strength required during sewing and fully dissolves during wet processing, eliminating the need for manual stitch removal.

Designed for modern apparel manufacturing, Aquamelt helps streamline operations, protect fabric integrity, and deliver consistently clean, high-quality finishes.

What is Coats® Aquamelt™?

Coats Aquamelt is a staple spun polyvinyl alcohol (PVA) sewing thread developed for temporary stitching applications. It replaces conventional basting or tacking threads and is suitable for apparel, as well as selected footwear and accessories uses.

Key Features

- Water-soluble thread for temporary stitching applications
- Fully dissolves during wet processing with no residue or staining
- Delivers clean seam finishes with no loose or untrimmed threads
- Suitable for delicate and sensitive fabrics
- Certified to OEKO-TEX® STANDARD 100, Product Class I
- Compatible with standard sewing operations

Typical Applications

Ideal for temporary stitching across a wide range of garment constructions:

- Waistband basting
- Neckline and armhole gathering
- Hand and machine appliqué
- Pleat formation
- Line matching stitches
- Bias-cut patterns
- Difficult fabric matching
- Striped and checkered fabrics:
Shirts, skirts, dresses, trousers, and ladies' tops

Customer Benefits

Reduce processing time:

Eliminates the need for manual stitch removal

Lower production costs:

Minimizes labour, rework, and handling

Protect fabric quality:

Avoids damage caused by removing temporary seams

Achieve cleaner finishes:

No residual threads, no compromise on appearance

Improve productivity:

Simplifies workflows for faster, more efficient manufacturing

Why choose Coats® Aquamelt™?

Because temporary stitching should never slow you down.

Coats Aquamelt enables manufacturers to enhance efficiency, reduce unnecessary operations, and achieve superior garment quality—while benefiting from Coats' global expertise and technical support. Performance you can rely on:

- Dissolves in water (recommended $\geq 40^{\circ}\text{C}$)
- No residue after washing
- Stable during sewing with reliable strength
- Designed for consistent performance in industrial applications

Let's optimize your production with Coats Aquamelt, you can simplify your processes, reduce hidden costs, and deliver better results—every time.

CONNECTING. PIONEERING. TRUSTED.
