I9679	 Ivy

STRIP 3

I9685	 Antique Silver
I8925	 Iris
I8926	 Multicolour 1

OEKO-TEX® STANDARD 100, Product Class I

Textile Care

The resistance to any particular chemical or tarnishing to leather with high oil content will depend on the individual circumstances. Technical advice should be sought from your nearest Coats unit if the application involves chemical treatment and/or materials with high oil content. For any Footwear test requirement, please check first with your Coats representative before using in mass production..

Due to extreme fluctuations in demand, we ask for your understanding that not all shades are available in all markets.

Please note this is a colour reference and should be used for guideline purposes only. We strongly advise against printing this shadecard, as lighting conditions and printer limitations may distort the final colour displayed. For a true representation of the desired shade against fabric material, a physical shadecard should be used.

Coats threads are manufactured and quality controlled to the highest standards possible. Since the conditions of use, washing, pressing and cleaning etc. vary, the purchaser should assure themselves by preliminary tests that the dye fastness of the yarn or thread is 100% colourfast to crocking or washing under all conditions. We cannot be responsible for any consequential damages howsoever caused since the value of the thread is so disproportionate to the value of the goods into which it is stitched.

Since conditions and applications vary considerably in the use of a product, the customer and/or user should assure themselves that the product meets end customer requirements and is suitable for the intended end use. Coats® accepts no liability for unsuitable or improper use or application of products. Shade Cards are updated from time to time, please be sure you are referring to the most recent publication. Coats® supports customers with advice on individual applications on request; if you have any questions or concerns, please contact us.
